

Jose Luis Olivar

Full-Stack Developer — Drupal · Next.js · TypeScript · Drupal Commerce

+57 314 802 1412 olivarjoseluis9@gmail.com linkedin.com/in/joseluisolivar github.com/olivarjoseluis Colombia — Open to Remote

PROFESSIONAL SUMMARY

Frontend engineer with 5+ years delivering pixel-perfect, high-performance web experiences on the Drupal ecosystem — from institutional portals and corporate multi-sites to Drupal Commerce stores and decoupled architectures with Next.js and TypeScript. Before any implementation, I define the component design system and theming schema: reusable structures that reduce delivery time and ensure visual consistency across the entire project. This approach cut page-building time by 25% at UDLA and enabled consistent delivery across 27+ projects for a European agency on Drupal 9, 10, and 11. Experienced working fully remote with international teams (Spain, Latin America).

KEY SKILLS

Frontend	HTML5, CSS3, Sass/SCSS, JavaScript ES6+, TypeScript, Twig, Tailwind CSS, Bootstrap 5, jQuery, Atomic Design, BEM, Responsive Design
Frameworks	Next.js, React, Node.js (Next.js API Routes)
Backend / CMS	PHP, Drupal 8/9/10/11 (theming, site building, Views, entities, custom modules), Drupal Commerce, WordPress
Auth & APIs	REST APIs, JWT, NextAuth, session management
Databases	MySQL, PostgreSQL
DevOps / Tools	Git, Docker, DDEV, Lando, Pantheon, JIRA, Figma, Swiper.js
Languages	Spanish (native) · English B2 — professional written communication, conversational

PROFESSIONAL EXPERIENCE

Freelance Drupal Developer

2022 – Present

Factoría de Arte y Diseño S.L.U. Spain · Remote

- Ongoing remote collaboration with a Spanish digital agency across **27+ projects** on Drupal 9, 10, and 11.
- Before each project: defined the **theming schema and component design system** to maximize reuse, reduce implementation time, and guarantee pixel-perfect consistency from Figma to production.

E-commerce (Drupal Commerce)

- Kataplum, Recorcholis, Diniz, Manymore, UPA, Oltex — theming, catalog structure, cart and checkout flows.

CRM & B2B Platforms

- Nabiax CRM (D9 and D10), Livedc Nabiax — frontend, dynamic alerting (SweetAlert), front hardening.

Corporate & Institutional

- Atela Architectes (D9→D11 migration), Agora Fresenius Kabi (Bootstrap 5 subtheme, accessibility), Sangines, Citytour, Lamar Development, Algoritmia, Habitalk, Centro Tractor, Matelier, Christiania.

Health, Sports & Tooling

- Regenera Clinic, Nutritalks, Muchomejorsin — responsive, accessibility-focused frontends.
- campusikercasillas.com — responsive layout, Swiper.js galleries, load time improvements.
- QRPlus D10, Directorio SEO D10, Habitalk.

Role: 90% pixel-perfect frontend theming, component architecture and content structure. Custom module development for specific requirements.

Full-Stack Drupal Developer

Sep 2023 – Present

Universidad de las Américas (UDLA) Ecuador · Remote

- Architected the frontend of a **decoupled platform (Drupal 10 Headless + Next.js/TypeScript)**: defined API contracts with the backend team and consumed endpoints for high-performance interactive components.
- Designed an **Atomic Design component system** that reduced new page assembly time by **~25%**.
- Implemented TypeScript across all frontend components and API contracts, enforcing type safety at the integration layer.
- Built **Perfilame** (multi-site): shared endpoints between sites, access control, and session management with NextAuth/JWT.
- Collaborated with the backend team to define and optimize API contracts, improving integration performance.

Stack: Drupal 10 · Next.js · TypeScript · React · PHP · PostgreSQL · Docker · DDEV · Pantheon · Figma

Frontend Developer

Jul 2021 – Nov 2022

VMLY&R Colombia (WPP) Colombia

- Developed and maintained **15+ responsive portals** for corporate accounts including Sherwin-Williams Southern Cone.
- Reduced page load times by **10%** through CSS/JS optimization, lazy loading, and asset hygiene.
- Resolved **50+ production tickets** (bugs and features), maintaining stability across simultaneous live sites.
- Delivered multisite migration **2 weeks ahead of schedule**.
- Converted Figma prototypes into Drupal components (Twig/Sass) with pixel-perfect visual consistency.

Team recognition award for performance, 2021.

Junior Frontend Developer

Jul 2019 – Jul 2021

Pontificia Universidad Javeriana Cali Colombia

- Maintained and extended the main university portal (javerianacali.edu.co) — theming, content types, and views.
- Built **emisora.javerianacali.edu.co** from scratch: full theming and interactive features.
- Managed Drupal 7 subsite migrations and created A/B testing interfaces to improve user experience.
- Transformed low/high-fidelity wireframes into Drupal content types and views, empowering non-technical editors.

NOTABLE PROJECTS

UDLA Platform (Drupal 10 + Next.js/TypeScript) — Decoupled architecture for scalability and performance. API contract design and modular frontend consumption.

Perfilame (multi-site) — Shared endpoint exposure and consumption across sites, access control, state management and caching.

Nabix CRM (D9 & D10) — B2B portal with dynamic alerting (SweetAlert) and front hardening for enterprise client.

Agora Fresenius Kabi — Bootstrap 5 subtheme with reusable component library and WCAG accessibility standards.

campusikercasillas.com — Responsive layout, Swiper.js galleries, load time and accessibility improvements.

Drupal Commerce stores (Kataplum, Recorcholis, Diniz, Manymore) — E-commerce theming, catalog structure and checkout flows on Drupal Commerce.

EDUCATION

Bachelor's Degree in Systems Engineering — 2020

Universidad Cooperativa de Colombia · Santiago de Cali, Colombia

International Academic Exchange — 2018

Universidad de Monterrey · Monterrey, Mexico

KEY ACHIEVEMENTS

- **–25%** page assembly time via Atomic Design component system at UDLA.
- **–10%** load times through CSS/JS optimization and lazy loading at VMLY&R.
- **27+ projects** delivered consistently for European agency on Drupal 9, 10, and 11.
- Multisite migration delivered **2 weeks ahead of schedule** at VMLY&R.
- Pixel-perfect Figma-to-Drupal delivery across **15+ corporate portals** for high-traffic clients.
